

About Jet Planes' "Master Scheduling":

From Carol Boden: "Whenever I hear jets overhead, I check this website: <http://sua.faa.gov/sua/special.do?selected=2&sua=conus> <<http://sua.faa.gov/sua/special.do?selected=2&ua=conus>> to see:

- a) if it is scheduled with the FAA, and
- b) how long it is scheduled to last.

I have not experienced a time that wasn't scheduled with the FAA yet.

(If you go to the link above, click on SUA, then select ME in the State drop down box. To check a map, click on SUA Map, then on the right side of the screen, select Maine and press the Update Map button at the bottom right to see only northern New England)."

Don't forget to adjust the time stated to our time. You have to deduct 6 hours." (for Eastern Standard Time)
